

## About Us

LCO Technologies often recognizes industry-wide problems & creates innovative solutions to solve them. Through the innovation & optimization of existing technology, our products offer modern benefits & interaction without the cost & hassle that comes with the replacement of legacy assets.

## Field Tests Prove It True

Don't just take our word for it—prominent oil and gas producers in the Grande Prairie area have found success using the **One N' Done** in a 5100 style pump. 4+ Months of Leak-free runtime with no operational issues, customers report it significantly outlasts traditional vee packings, reducing the need for repairs.

## Our Product

# The **One N' Done** Packing

### Chemical Compatibility

Introducing the **One N' Done** packing, the first cartridge-style pump packing designed to withstand all chemical compounds in the field. Being universally compatible, it eliminates the need to choose between different vee packings. Say goodbye to frequent replacements—this packing is built for the toughest installations.

### The Universal Size

Forget the days of stuffing chevron packing into fluid ends. Our spring-loaded cartridge grips the internal diameter to prevent fluid leaks. Paired with our **XF1** or **XF2 O-Rings**, you no longer need to worry about product compatibility. Available in all sizes ( $\frac{1}{2}$ ",  $\frac{3}{8}$ ",  $\frac{1}{4}$ ",  $\frac{3}{16}$ "), our solution works seamlessly with 5100 or 5000 series pumps. Welcome to the future of reduced repair and work orders. Contact us today for more information.
